The following statistical information is based upon the summaries of the 1922 annual reports received by the Office of Cooperative Extension Work from the 3,402 cooperatively employed county extension agents. While the Office of Extension Work in the North and West and the Office of Extension Work in the South were combined into one office on October 1, 1921, it was thought advisable to continue the use of existing report forms in 1922. In many instances, therefore, essential information is not available on a truly national basis, owing to the difference in the items included and in the methods of securing information employed in the five different annual report forms used by county extension agents in 1922. In so far as possible, however, national information is given.

No attempt is made at this time to draw conclusions from the data presented as this will be covered in more formal publications to be issued later. The statistical data from the 1922 reports are merely assembled for the immediate information of extension workers. The number of agents reporting on the various items is included for purposes of comparison and as one indication of the national importance of the various lines of extension work.
